## **Exciting Enrichment Opportunities Available for All Students**

The Elementary Enrichment website offers many exciting enrichment opportunities to all students in grades K through 5. Students can participate in a wide variety of challenges, including Mathlete & Super Solver math problems, creative writing activities and more. New this month is an Invent It Challenge where K - 5 students can work independently or with friends to come up with an invention that will benefit the environment. Third, fourth and fifth graders can participate in Scholastic's Amazing People contest. Also new this year, K - 5 students can pursue an independent research project with the support of their Enrichment Specialist if they choose to work on a Genius Project.

Details are provided for these and other exciting challenges on the Elementary Enrichment website. The website can be located by going to [wayneschools.com](http://wayneschools.com) or your school's homepage and clicking on the STUDENTS tab to find the Elementary Enrichment link. You can also access it directly by going to: <http://elementaryenrichment.wixsite.com/wtps>

The district's Enrichment Specialists monitor student submissions and provide feedback and guidance. They also add new projects regularly. Please visit the website for more information and contact your Enrichment Specialist with any questions.
